REVIEW OF
STUDY PROGRAM OF SECOND (MASTER'S) LEVEL OF HIGHER
EDUCATION
“ECONOMIC AND ADMINISTRATIVE LAW AND PROCESS”

Educational and professional training of specialists in the field of law is a very important task for Ukraine, as well as for any other state. Ukraine is rapidly developing in the political, economic, and social spheres, which inevitably requires taking into account and raising the standards of legal aid.

The program which was presented for the review concerns the preparation of students for the qualification of Master of Laws, 90 ECTS credits, duration of study 1 year and 4 months. The professional competencies and learning outcomes, defined by the program, testify the high level of professional training of graduates. The 24 credits, allocated to elective educational components, allow the student to formulate an individual educational trajectory. This will help him to become a highly qualified lawyer with a choice of specialization within the specialty of law. The effectiveness of the educational process is ensured by its logical construction, well-thought-out and balanced structure of the program, a rational combination of theoretical and practical training which meets the needs of stakeholders.
